PROJECT WORK

E-COMMERCE WEBSITE

- Independently conceived and developed an e-commerce platform for an Instagram-based jewellery brand, *thenujastore*, featuring product catalog, smooth checkout process and responsive design.
- Utilised technologies such as ReactJS, NodeJS, TypeScript and CSS to deliver a user-friendly shopping experience.
- Demonstrated proficiency in crafting intuitive user interfaces, optimising performance, and ensuring seamless functionality across all devices.

PROFESSIONAL EXPERIENCE

FULL STACK DEVELOPER, [Denso Corporation](#) | Tokyo, Japan

April 2022 – present

- Developed and implemented a real-time car data monitoring system, capturing and displaying live vehicle data on a **ReactJS** web application.
- Designed an intuitive dashboard interface to visualise key metrics including speed, fuel consumption, and engine status.
- Created scalable and efficient **RESTful APIs** utilising AWS Amplify, AppSync, ECS, ECR, Lambda, SES, DynamoDB, NodeJS, ReactJS, and TypeScript.
- Maintained **automated tests**, increasing software delivery efficiency and reducing deployment errors.
- Provided guidance and support to junior developers, helping them navigate challenges and obstacles, fostering professional growth and development within the team.
- Facilitated effective **communication** and **collaboration** among English and Japanese-speaking team members, resulting in a cohesive work environment.
